

Introduction

File Overview: This file contains a dump of most of the codebase files for a task management app in development. It contains one file after the other. Each file has the filename listed at the top before the file contents. The code stack includes PHP, HTML, CSS, Javascript. I'm developing locally on my PC in VS Code. I coded a lot in the past, but I'm a beginner in many things as I start coding again.

File: .\temp.php

```
<?php phpinfo(); ?>
```

File: .\config\Database.php

```
<?php
```

```
class Database {
```

```
    private $host = 'localhost';
```

```
    private $db_name = 'happydo';
```

```
    private $username = 'root';
```

```
    private $password = '';
```

```
    //private $password = '9a00wo41';
```

```
    private $conn;
```

```
    public function connect() {
```

```
        $this->conn = null;
```

```
        try {
```

```
            $this->conn = new PDO('mysql:host=' . $this->host . ';dbname=' . $this->db_name, $this->username,
```

```
$this->password);
```

```
